

Getting Started with Creative Coding: Scratch

<p>1.</p>	<p>Choose a Creative Coding with Scratch project.</p>	
<p>2.</p>	<p>Watch the “How To” intro video if this is your first time.</p>	
<p>3.</p>	<p>Explore the interface and assets library for your project.</p>	

4. Experiment and have fun!
Tinker with the coding blocks and assets (don't worry—you can't break it!).

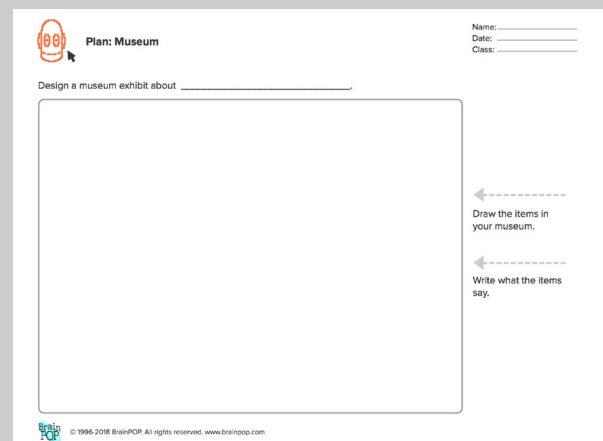

5. When you finish experimenting, refresh your page.

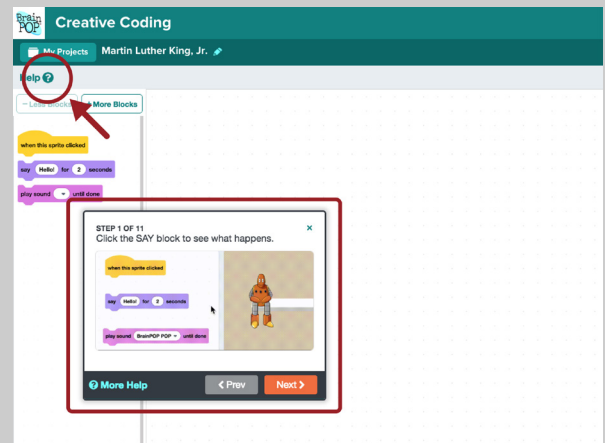

6. Plan out on paper what you want to happen in your final project. Find planning pages on our Educator resource page:

[educators.brainpop.com/
creative-coding-teaching-
resources](https://educators.brainpop.com/creative-coding-teaching-resources)

7. Code your project! Use the tutorial cards to guide you or try it on your own.

8. Save your final project and submit to your teacher.
